## Professional Summary

Software engineering student and iOS developer specializing in Swift, SwiftUI, and modern app architecture. Currently building a production-grade business management application (BasicBusiness) focused on real-world workflows, scalable design, and long-term maintainability. Combines strong architectural thinking with 12 years of high-performance service industry experience, bringing reliability, communication, and execution to engineering teams.

## Professional Experience

### AppReady — Software Engineering Experience

Independent / Contract Development | Jan 2025 – Present

- One year of real-world software engineering experience supported and verifiable by AppReady ownership
- Designed and implemented SwiftUI applications using MVVM, Clean Architecture, and The Composable Architecture (TCA)
- Built validation systems, persistence layers, and modular feature-based architectures
- Professional references available from company ownership

### BasicBusiness — Founder & iOS Developer

Jan 2025 – Present | App Store release planned late 2026

- Architected and built a business management iOS app for real service-based businesses
- Implemented customers, quotes, invoices, journal/ledger systems, and local-first persistence
- Applied MVVM, Clean Architecture, and protocol-driven design for scalability
- Focused on real-world usability, performance, and maintainable long-term architecture

### Outback Steakhouse — Senior Server / Headwaiter

2013 – Present

- 12 years of high-volume service experience in a demanding, performance-driven environment
- Consistently top performer in guest satisfaction and reliability metrics
- Trusted with leadership responsibilities including end-of-night financial handling and team coordination
- Developed strong communication, situational awareness, and execution under pressure

## Education

A.S. Computer Programming & Analysis — Valencia College

15 credits remaining | 4.0 GPA

Technical Certificate – Computer Programming Specialist

Valencia College | Awarded December 2025

## Technical Skills

Swift 6, SwiftUI, MVVM, Clean Architecture, The Composable Architecture (TCA), iOS Persistence, JSON, Async/Await, Git & GitHub, Xcode, App Store Deployment (in progress)
